

Stem for Pots

Materials:

construction paper in red and white (or other colours), thin wooden dowel, glue gun

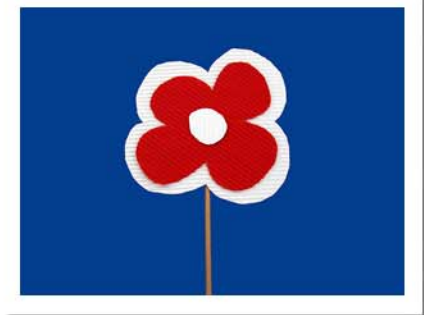

01 step:

Draw a large flower on the red construction paper and then cut it out. Then cut out a smaller flower from the white construction paper, or vice-versa.

02 step:

Glue the smaller flower onto the big one. Attach the wooden dowel to the reverse side with a glue gun. A bow can also be tied to the wooden dowel.

03 step:

And in a flash, here is an excellent gift with which even the little ones who know how to cut and paste can help, one which moms, dads, and grandparents can enjoy tremendously and which will last.
