

Greeting card

Materials:

coloured paper, white paper, green paper, felt pens, scissors, paste or glue

01 step:

First copy the flower patterns (the pattern with the dotted line on the coloured paper and the other pattern on the white paper) and then cut them out. The coloured blossoms are only cut along the dotted lines and then folded. Transfer the patterns of the leaves onto the green paper and then cut them out. The name of the recipient of the flower card can be written on the edge of the white blossoms.

02 step:

Now just glue the white blossoms into a piece of paper that has been folded in half. Glue the leaves to that and finally the red folded blossoms, and the greeting card is finished.
