

Conker sun

Materials:

yellow beads, small sticks of wood, nice big conker, wool or raffia, glue, needle

01 step:

With the help of an adult, prick seven holes around the sides of a conker at equal distances.

02 step:

Put a 7 cm stick of wood in each of these holes. Then weave the wool in between the sticks around the conker. After about two or three centimetres, you can tie a knot so that the wool does not come undone again.

03 step:

Now put the beads on. You have to stick the last bead on each stick with glue. Now you can hang up your conker sun. It's also a great present!
